Websites

In our ever-changing digital world, your website is quickly becoming the first face and first impression of your business. Don't scare your customers away with an outdated or non-existent website - that's nearly worse than bad breath or spinach in your teeth. Don't worry; it can be easier than you think.

Our team offers personalised, flexible, third-party websites as a solution for start-ups and small-to-medium ag-based businesses. We geek out about the idea of helping you make your first impression look good.

What you get

- A website built on a third-party platform of your choice (we recommend Rocketspark)
- We will refine your supplied copy to ensure it is optimised for SEO
- A website that is on-brand - all styling will align with your brand colours and fonts
- Domain purchasing and/or transfer
- All technical elements completed, e.g. Google indexing, SEO check
- Full user testing before launch
- CMS training for the website owner and contributors
